

KUDOKEN

WHITE PAPERS **2021**
KUDOKEN CRYPTO TOKEN

Kudoken is a decentralized utility token that incentivizes community participants and business relationships via rewards on our exclusive platform.

KUDOKEN.IO

KUDOKEN-DISLAIMER

DISCLAIMER INTRODUCTION

The purchaser of KUDOKEN tokens understands and accepts that KUDOKEN Team has no intention of substituting the purchaser in the knowledge that the latter must hold for his purchases on the crypto-active market. Thus, the buyer of KUDOKEN tokens undertakes and acknowledges understanding the field of crypto-assets, systems developed by KUDOKEN Team as well as the mechanism of the Blockchain. It includes the risks associated with STO (Security Token Offering) as well as the mechanism related to the use of crypto-assets and, more specifically, KUDOKEN tokens (including storage).

- KUDOKEN TEAM SHALL NOT BE LIABLE FOR THE LOSS OF KUDOKEN TOKENS, PIRACY, AND/OR SITUATIONS CAUSING THE BUYER TO BE UNABLE TO ACCESS KUDOKEN TOKENS THAT MAY RESULT FROM ANY ACTIONS OR OMISSIONS OF THE KUDOKEN TOKEN BUYER AND THE USER OF THE SERVICES OFFERED BY KUDOKEN TEAM. THIS WHITEPAPER DOES NOT CONSTITUTE A PROSPECTUS OR OFFERING DOCUMENT. IT IS NOT INTENDED TO CONSTITUTE AN OFFER TO SELL, OR AN INVITATION TO AN OFFER TO BUY AND/OR SUBSCRIBE. THIS WHITEPAPER IS ALSO NOT INTENDED AS A SOLICITATION TO INVEST IN SECURITIES OR ANY OTHER FORM OF INVESTMENT PRODUCTS. THIS WHITEPAPER, IN WHOLE OR IN PART, AND THE COPY THEREOF, MUST NOT BE TAKEN OR TRANSMITTED TO ANY COUNTRY WHERE THE DISTRIBUTION AND DISTRIBUTION OF WHITEPAPERS IS PROHIBITED OR RESTRICTED.

1. GENERAL INFORMATIONS

The KUDOKEN token will not be legally considered as a security since it does not give rights to dividends, interest, profit-sharing, or any other remuneration related to the company KUDOKEN TEAM. Also, KUDOKEN tokens will not be considered as shares because they do not give access to the ordinary or extraordinary general meetings of KUDOKEN TEAM.

The sale of KUDOKEN tokens is final and non-refundable. These cannot be used outside the platform developed by KUDOKEN TEAM. Accordingly, they cannot and should not be purchased for speculative or investment purposes. The buyer of KUDOKEN tokens understands and is aware that KUDOKEN tokens issued by KUDOKEN TEAM operate on a decentralized and unregulated market. The information provided by KUDOKEN TEAM relates to KUDOKEN tokens, and the purchaser of these tokens understands that no specific European regulatory framework regulates this activity. Consequently, the buyer is aware that, when he buys KUDOKEN tokens, he does not benefit from legal and/or regulatory protection.

Anyone purchasing KUDOKEN tokens understands, accepts and acknowledges that he/she has carefully reviewed this whitepaper and/or the kudoken.io site and fully understands the risks, costs and benefits associated with purchasing KUDOKEN tokens and the services offered by KUDOKEN TEAM.

2. RISKS 2.1

2.1 General information on the risks associated with crypto-assets

2.1.1 Risks related to trading or holding of crypto-assets

The buyer acknowledges understanding and awareness that the crypto-active markets are decentralized and unregulated markets. The KUDOKEN tokens issued and the services offered by KUDOKEN TEAM therefore concern unregulated markets which are not governed by any specific European framework. In other words, unlike "traditional" financial assets, the Central Bank cannot take corrective measures that could protect the value of crypto-assets in the event of a crisis or issue more assets on the markets.

Crypto-active markets are determined by supply and demand. These markets are dynamic and the corresponding prices are often extremely unpredictable and volatile. Crypto-active prices are generally not transparent, highly speculative and susceptible to market manipulation. In the worst-case scenario, assets may be reduced to zero. Also, the buyer of KUDOKEN tokens and the user of the services offered by KUDOKEN TEAM acknowledges being aware that the crypto-assets, due to their lack of regulation, are likely to be misused for illegal activities because of the anonymity of transactions. Law enforcement and financial market regulators are therefore likely to investigate suspected illegal activities, which could harm the buyer and/or user. Therefore, crypto-assets should be considered an extremely high-risk asset and the buyer should always buy with awareness and understanding that he may lose these funds. Buying crypto-assets is not for everyone.

The buyer therefore understands that he should not purchase KUDOKEN tokens unless he has the necessary knowledge and expertise, understands the characteristics of the token, the STO, the whitepaper and his exposure to risk. The buyer of KUDOKEN tokens and the user of the services offered by KUDOKEN TEAM understands and accepts that KUDOKEN TEAM and this whitepaper are in no way intended to substitute the buyer and user in the knowledge they must hold for the purchase of KUDOKEN tokens. Indeed, the buyer recognizes that the risk of loss in the purchase of crypto-assets can be considerable. It must therefore carefully examine whether purchasing on this type of market is appropriate in view of its financial situation and resources. The buyer understands that a total loss of tokens is possible.

2.1.2 Risks related to the Blockchain

The Blockchain is a public peer-to-peer network independent and free from any European legislation or regulation. The Buyer understands that errors, mistakes and/or violations may occur in the Blockchain and could result in the loss of KUDOKEN tokens purchased. Also, the Purchaser understands that it is bound and subject to any change and/or modification in the Blockchain system and is subject to any applicable law that may apply to the Blockchain. If KUDOKEN TEAM can provide information about legislative and regulatory changes that may occur, KUDOKEN TEAM is not intended to inform on the subject and gives no guarantee, express or implied, statutory or otherwise, regarding the functions, legislation in force and/or security in the Blockchain.

2.2 Specific information on KUDOKEN token risks

The acquisition and storage of KUDOKEN tokens involves various risks. Among these, KUDOKEN TEAM may not be able to launch its operations or projects including the development of its Blockchain or the services promised in this Whitepaper.

Accordingly, and before acquiring KUDOKEN tokens, all users acknowledge that they have fully considered the risks, costs and benefits associated with the acquisition of KUDOKEN tokens, the context of the STO and, if necessary, have obtained the advice of a professional specialist on this subject.

Any interested person not being able to accept or understand the risks associated with the business (including risks associated with the non-development of the KUDOKEN TEAM platform or any other risk as indicated in Article 2.1 above).

2.3 Important warning about the Whitepaper and the economic model

This Whitepaper should not be considered as an invitation to invest. It does not constitute or relate in any way to an offering of securities. This whitepaper does not include or provide any information or indication that could be considered by the buyer as a recommendation or incentive to invest.

The possibility of purchasing KUDOKEN tokens on trading platforms is intended solely to enable the use of the services offered by KUDOKEN TEAM and should not be an investment incentive. Furthermore, KUDOKEN TEAM should not be considered a legal, tax or financial advisor. All information provided in this whitepaper is provided for general information purposes only and KUDOKEN TEAM makes no warranty as to the accuracy or completeness of such information.

KUDOKEN TEAM cannot be considered a financial intermediary under Articles L. 519-1, L. 541-1, L. 545-1, L.547-1 L 548-1 of the Monetary and Financial Code. As a result, KUDOKEN TEAM is not required to obtain anti-money laundering authorizations and to register under Art. L. 546-1 of the Monetary and Financial Code. The acquisition of KUDOKEN tokens does not confer any rights on KUDOKEN TEAM's activities.

The buyer of KUDOKEN tokens understands and accepts that national regulatory authorities may carefully examine companies and transactions associated with crypto-assets around the world. Consequently, regulatory measures, investigations and actions may affect the activities of KUDOKEN TEAM and even limit or prevent its development. The buyer understands the KUDOKEN TEAM business model and that, in the future, the whitepaper and business terms may change due to new regulatory requirements. In this case, the purchaser of KUDOKEN tokens acknowledges and understands that KUDOKEN TEAM shall not be liable for any direct or indirect loss or damage as a result of such changes. These factors of change include, among others:

- A change in the political, social, economic and stock market conditions of the crypto-active market as well as a change in the regulatory environment in the countries in which KUDOKEN TEAM carries out its operations and activities;
- The risk that KUDOKEN TEAM may be unable to execute or implement its business strategy and future development;
- Changes in interest rates and/or exchange rates of fiduciary currencies and crypto-assets;
- An anticipated change in growth strategy and expected organic growth;
- A change in the availability and fees payable to KUDOKEN TEAM in connection with its business and operations;
- A change in the availability and salaries of employees that are required by KUDOKEN TEAM to operate its business and implement its operations;
- A change in the competitive conditions in which KUDOKEN TEAM operates;
- A change in KUDOKEN TEAM's capital requirements and funding availability;
- War or acts of national and international terrorism;
- The occurrence of catastrophic events, natural disasters or any other event outside KUDOKEN TEAM;
- Other factors beyond KUDOKEN TEAM's control. KUDOKEN TEAM will do everything possible to launch its operations and develop its platform.

The buyer of KUDOKEN tokens understands that KUDOKEN TEAM does not provide any guarantee on the objectives it wishes to achieve. Consequently, KUDOKEN TEAM, its organs and employees are not liable for any loss or damage resulting from the impossibility of using KUDOKEN tokens, except in the event of intentional fault or negligence on the part of KUDOKEN TEAM. Thus, the buyer understands and accepts that nothing in this whitepaper or the KUDOKEN.art site is or can be considered as a promise or a commitment regarding the performance or future policies of KUDOKEN TEAM.

3. GUARANTEE

By participating in the STO, the buyer understands and accepts the foregoing and in particular warrants to:

- Have carefully read and accept the entire content of the whitepaper;
- Have the authorization and full powers to purchase KUDOKEN tokens through an STO according to the laws that apply in the territory of his domicile;
- Reside in a jurisdiction allowing KUDOKEN TEAM to sell KUDOKEN tokens through an STO without requiring authorization by the competent courts of the place of its domicile;
- Not use the STO for illegal activities such as (but not limited to) money laundering and terrorist financing;
- Have sufficient knowledge of the nature of KUDOKEN tokens and have significant understanding and experience with crypto-assets and Blockchain-based systems;
- Buy KUDOKEN tokens only to access the platform devel

IN CASE OF DOUBT REGARDING THE PURCHASE OF KUDOKEN TOKENS, YOU MUST CONSULT A COMPETENT LEGAL, FINANCIAL, TAX OR OTHER PROFESSIONAL ADVISOR.

Introduction:

As the landscape of blockchain technology continues to grow, we are witnessing the use case for alt-coins and Tokens evolve to previously unimagined levels.

The wide spread prediction is that this uptrend in technology acceptance will continue; especially as new developers and investors enter the market. With the continued rise of BCH and news coverage slowly changing rhetoric from "just a trend" to "stable investment", it's a good time to be invested/involved in the crypto industry. Kudoken currency is a nod to the incredible versatility of decentralized finance utility tokens and the evolution of the blockchain technology. Kudoken showcases some of the most popular mechanics in the industry and offers useability beyond the secular approach other tokens offer.

The ability to utilize digital resources at the touch of a "touch screen" and work across the world with talent from every stretch of the imagination is what brought this project to life. Baghledesh, India, Pakistan, Sask. Canada, Italy, and Portland Oregon assisted in the facilitation and creation of this token. Leveraging the spotlight of this emerging market and the access to resources beyond one talent pool. We have created a reward system token that brings business, commerce, entertainment, and technology together.

The Kudoken platform will be unique in its ability to act as a decentralized reward system for all participants of the system. Merchants, consumers, store owners, employees, and everyone in-between can use the Kudoken Token to show appreciation and get rewards. Regardless of the sender, the receiver can choose to utilize the token how they see fit. Invest, spend, stake, get one-of-a-kind rewards, use locally or online, or trade for currency via Uniswap. Whether Physical or Digital products piqued your interest there is plenty of ways to spend and the choice is yours!!

Mining:

"Remove This" is a first party created mining experience in the form of a top-down wave-based survival game. Miners will fight off hordes of aliens as they try to consume the player and stop them from collecting the rewards. As you progress through rounds in the game, you will pick up "Planet Rocks", that are rewarded in Kudoken after the game is over. You will also mine Kudoken rewards by exceeding boss battles, survival benchmarks, and receiving RND "air drops". Multiplayer and character customization will be part of the experience, and future development will include a host of planned development that is currently confidential. The heat will be on as the liquidity pool dwindles and tokens become limited due to available program supply. The goal of this mining experience is to create an interactive way to mine Kudoken while being accessible to individuals with a computer or smart phone. Other tokens mining applications have been exclusive to miners with the skillset, knowledge, or hardware to be able to participate in the mining of that token. We aim to create a mining experience that gives the community available access to the Kudoken interactive mining platform.

Use Cases:

We are excited to introduce our sponsors and businesses partners that have already adopted the Kudoken for services and goods. We have come together with some exciting companies to compile a pool of liquidity partners offering grade-A top of the line service in direct exchange for Kudoken Token. In addition, we have created our very own rewards marketplace offering some amazing one-of-a-kind, exclusive, and limited-edition content both physical and digital. Our rewards store carries a range of items such as:

- NFT's
 - Varying Types of NFT's
 - Audio
 - Visual
 - Art
 - Autographs
 - Exclusive Content
 - With Legends from all entertainment Platforms
- 1-of-1 crypto inspired clothing
- Skateboards
- Hydro Flasks
- 3D Anime-x-Crypto Gel Mousepad's
- Minted coin packages
- Fanny Packs
- and much more

Continued...

Identifying rarity and exclusivity is easy with our tiered class system. Offering some amazing value pieces for you to share or be kept exclusively for private viewing; existing only in your private collection.

Meadows:3R- Digital Horse Racing:

Wager your tokens in our digital horse track "Meadows 3R: Digital Horse Racing" events happening every Thursday starting Q2-Q3 2021. Try to predict the outcome for earnings of the reserved liquidity pool and enjoy the events showcase as we pay homage to recently closed Portland Meadows Racetrack.

Casino Partnership:

Kudoken will be taking advantage of casino games for a set liquidity pool during the rollout phase of the Kudoken. The purpose is to give another mining opportunity through the ever-popular casino games platforms. These platforms are great use case representations for large block hosting and crypto currencies. We will utilize a "winner takes all" emulsifier game rewards system to be rolled out with partnership announcement. (See Tokenomics information for liquidity amounts and event development dates)

Adoption:

Kudoken Y1 target is one thousand strategic partners exchanging services directly through use of the program's utilities. Commissioning incentives will act as a direct conduit to allocation based on a tiered system outlined in our "business partner rewards systems" documentation. We are going to see incredible gains in both the web based blockchain technology and use case for the programs we've created. Kudoken is a testament to the capabilities of a utility token with an entire ecosystem developed around its various mechanics. The excitement has been felt even during development prompting the adoption of our moniker #energyiscurrency. We believe excitement breathes life into projects and inclusiveness as well as independence creates some of the greatest gifts that humanity has to offer. Our energy is important, and the kudoken is a representation of that energy and strength. Kudoken is a community asset purpose built to facilitate that independence and provide the community with a platform to store that energy

Burn Notice!:

Several "allocations" of Kudoken are built into the frame work of the token's rewards system and with good reason! Each experience is custom made with the intention of token liquidity and distributive protection. We want to ensure access to the token is available and ways to receive, spend, and interact with the token are of good faith in nature. There are built in optional burn dates and kudoken liquidity parameters during rollout to give the chance to do controlled burns and remove circulating supply. (see tokenomics for large stake holder "hold period" requirements)

Transparency:

A common detractor to crypto/Alt-coin currency for investors, as well as adopters, can be perceived safety on investment. There are terms used for the coins that are nothing more than a gimmick, and those following the market for any length of time, have seen bad investment schemes moreover. We are extremely mindful of this scenario as Kudoken was created in-part because of this. We wanted a decentralized utility token that protected our business partners, investors, and our community; as well as ourselves. Something that was versatile enough to include the multitude of use cases. We also wanted liquidity for investment purposes, staking rewards for long-term stability, and the best mechanics. All of this while preserving great tokenomics for return on investment and overall value. Sheesh!

Our team believes whole heartedly that we have created such a token, with the understanding that we will grow with the industry and markets within. We are proud of our community, strategic business partners, and stellar team that created the token. We are excited for future endeavors as the blockchain environment continues to grow and the web 3.0 movements push into new technologies. Our commitment stands to be transparent with investors while taking considerate measures to move with the industry.

Cryptology (Cryptography/Cryptanalysis Security):

Concern for alt-coin security is another of the top concerns for investors, adopters, and developers alike. The ability to protect the assets and authenticate the validity of the blocks as they move through cyberspace is important. The security of Kudoken has been a recognized concern from day one and we have been mindful in not only the selection of Ethereum's ERC-20 block, and the coding/creation of the smart contract, but also in keeping our sights towards extra security in Layer 2 solutions adoption. Layer 2 options create direct representations of the tokens, called child tokens, to be protected and utilized across a ledger outside of the ether mainnet. This creation of child tokens adds a layer of security to the transactions and general tracking of a token. This security boost is achieved through a small-scale approach to the security and transactions. It's much easier to keep an eye on all aspects of a token if there are more eyes watching and less tokens to keep an eye on.

There are currently 200,000 ERC 20 tokens in existence with 2,600 of them listed for trade at the time of this writing. Utilization of the mainnet means being in the pool with all of the other tokens and listing on ether network gives people the information to check into your permissions and securities. Layer 2 offers a protection against breaches by creating "child" copies of all of the tokens (referred to as parent tokens) and then allowing safeguard of the original tokens to ensure nothing happens to them. This allows a verifiable tracking system and gives a safe guard by the original token being in cold storage and unaltered. They use a ledger system to verify and track "child" token transactions then transfer the information to "parent" tokens after.

Layer 2 Scaling:

The Kudoken team is committed to consistent improvement in the functionality, scalability, and provable security of the token. Layer 2 scaling has added value to the validation, transaction speeds, security, exchange hosting, and a host of other capabilities for individual tokens. Layer 2 efforts and implementation will result in the reduction of costs/fees, transaction times, and reliability. While making tokens far more cost effective and efficient. Blockchain scaling developers have utilized a variety of solutions types, so in partnering with a layer 2 scaling provider it is extremely important to choose solutions that fit your tokens overall needs. We have identified scaling solutions that will fit best with Kudoken's use cases, and are in position to partner with a solution that will offer the right level of transaction speed, cost efficiency, and security cryptology.

Staking Governance:

The decisions on the direction of Kudoken are meant to be in good faith with the community, strategic partners, and reputation/confidence of investment in mind. Since the Kudoken is an incentivized reward-based token, the recipients of the rewards are important to the Kudoken. The programs available should reflect the desires of the partners and community participants alike. With that in mind we encourage the community to actively participate in governance for token direction. This includes decisions like rewards offered, strategic partner alignment, allocation decisions, philanthropist efforts, and more. We will use staking as a governance system to add votes in the initial rollout phase of Kudoken. The options to stake for periods of time, and specific amounts, will determine the number of votes you get towards issues brought to vote. After initial rollout, we will launch the official governance token and continue the community driven approach from decision making through action.

Staking Platform Partnership:

Q4 will begin our delve into investment staking while we look to partner with a staking platform to offer the best returns available in house. Not only have we culminated amazing early adoption incentives, we have also taking sight on the expansion and continued growth of the kudoken several quarterly cycles into the future. Believing that as the market continues to expand and the technology advances, we will be in line to keep up with development into emerging areas.

Environmental and Animal Philanthropy:

Giving back is important to the Kudoken team as we are a community driven utility token focused on relationship expansion, decentralized independence, and support for our ecosystem. We wanted to create a token that was not only usable and profitable, but also helped protect our sustainability, protecting both animals and the environment. The Kudoken team has participated in countless efforts related to both animal and environmental conservation.

Our entertainment platforms demonstrate the true spirit of the commitment to conservation as "UrbanSurvivorman" shows interaction with sanctuaries like the ones these funds support. The Kudoken lends aid to supporting the mission of conservation, while protecting the investment shares that it grants. Community participation in the Kudoken ecosystem will grow the value of the tokens. As the value grows, so does the contribution from the community to the environmental-/animal rescue causes it is supporting. Through staking, their shares will grow and be available to use for resources involved with the animals! This is a great way to give back, support animals, and ensure tokens are protected through vestment and staking.

Kudoken of the Future:

We have already set sights on the next step for Kudoken acceptance and ease of use rewards participation. The evolution in business acceptance is systems development both digital and hardware varieties. While a lot our future map is safeguarded and confidential, know that Y1 is only the first step in our path to parabolic. We are taking steps already to equip Kudoken with exclusive interfacing, systems tailored to ease of use, and continuing our business partner relationships. The future of Kudoken is bright with adoption and support being both humbling and exciting. We have put a lot of our love, energy, resources, and thought into this token. The mechanics, tokenomics, marketing campaigns, and the meaning behind the token are all an example of our commitment to the Kudoken community. Spend your energy wisely.

WildCat Ridge Sanctuary

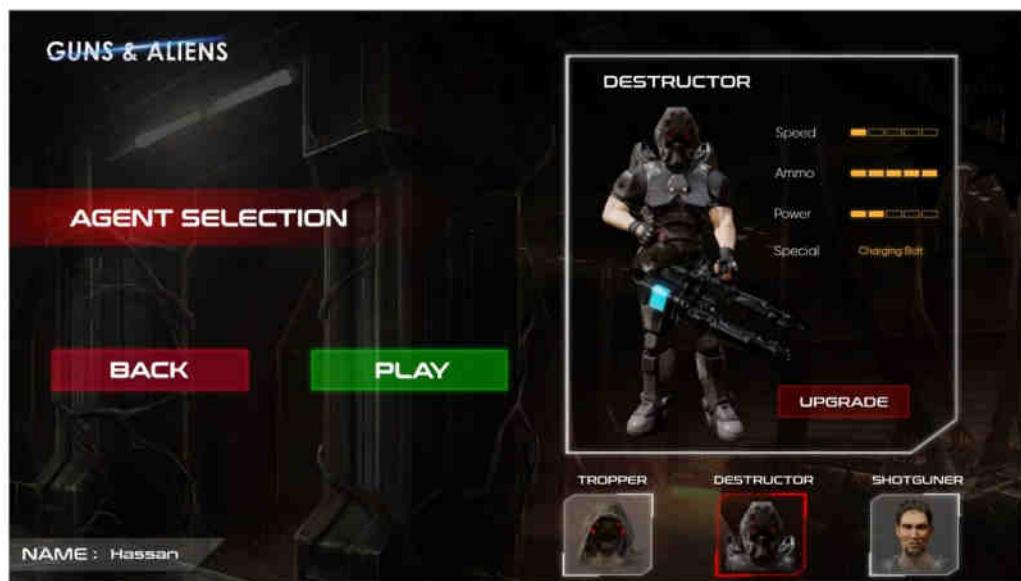

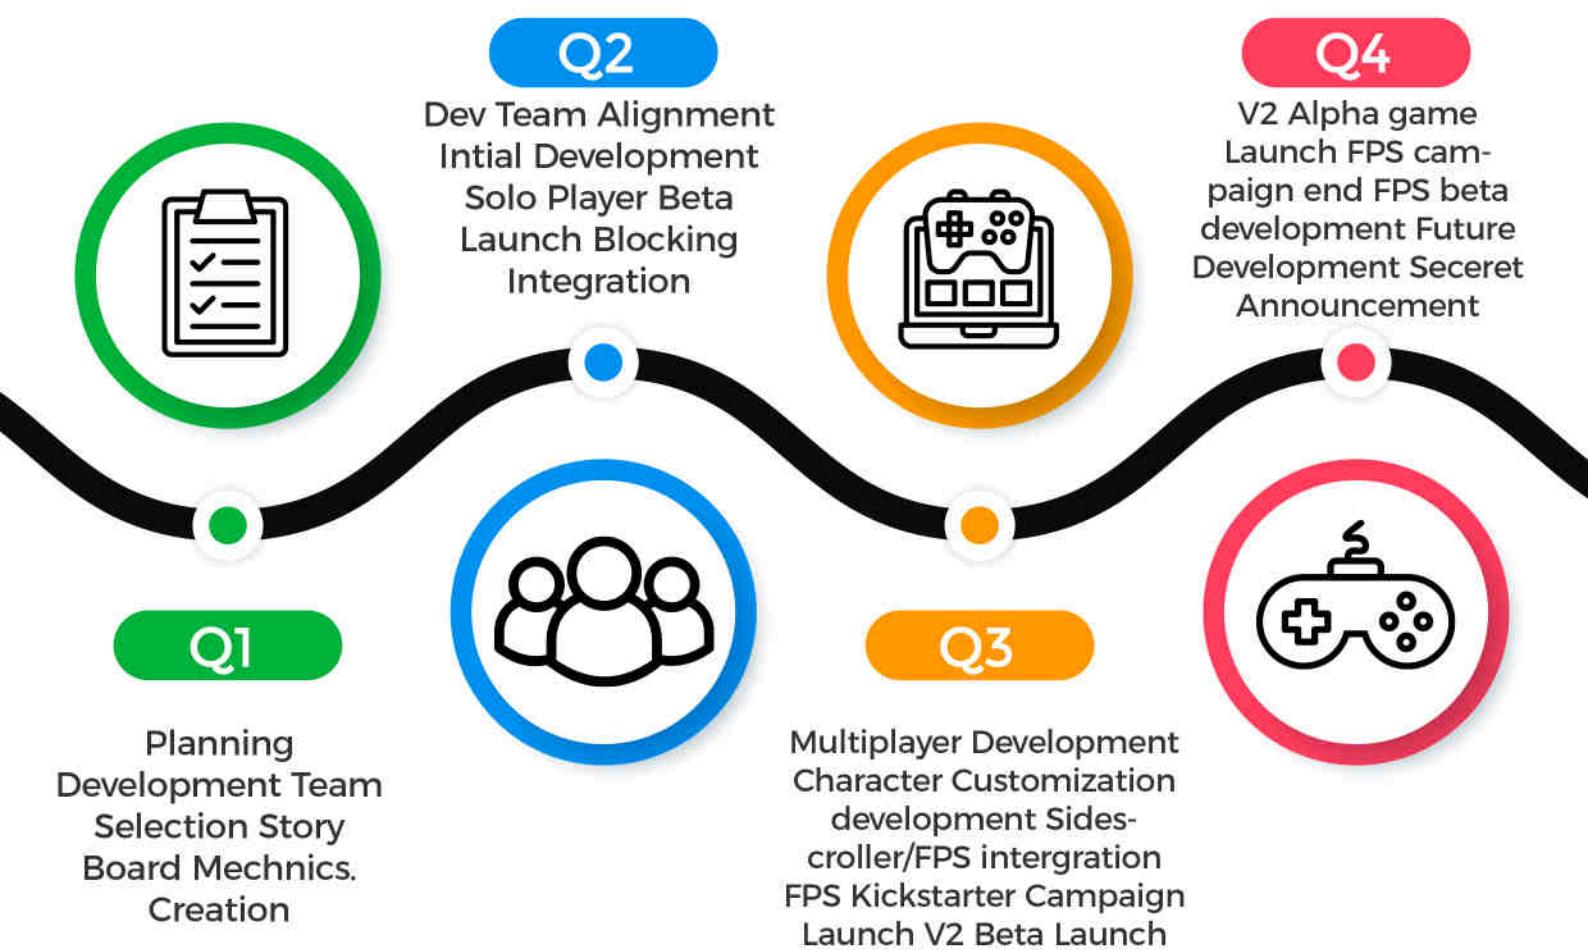

WildCat Ridge is a sanctuary for more than 80 animals including Bobcats, Caracals, Cheetahs, Cougars, Hybrids, Lions, Lynx, Serval, Tigers, and more. They are a nonprofit organization dedicated to their mission to provide a safe, natural lifetime home to all of their "residents". They are contributed to by direct donation support and ran by a grassroots team from the founders, board of directors, to their amazing volunteers. Kudoken team takes distinct pleasure to be able to contribute efforts on behalf of the community and support such an amazing cause. Find out more and donate directly at their website: <https://wildcatridge sanctuary.org/>

Big Island Sanctuary

Located on the Big Island of Hawaii in beautiful Naalehu, Big Island farm sanctuary is a privately owned and operated 25-acre, off-grid, animal rescue, offering a life of love and happiness to farmed and feral animals in need of sanctuary. Through interaction and education, we help people learn the truth about animal agriculture, make a meaningful connection with the animals we commonly call food, and show people how they can help stop the needless suffering of animals and the devastation to our planet, all while improving their own health. Find out more by visiting their website: bigislandfarmsanctuary.com.
